

## Extra

Remember, an **adjective** is a **describing word**.

The suffix **ful** can be added to the end of some words to make an adjective, like this:

help    **helpful**            use    **useful**

Notice that it only has one **l**.

Add the **ful** suffix to make these words into adjectives.

- |          |           |         |          |          |
|----------|-----------|---------|----------|----------|
| 1 shame  | 2 deceit  | 3 spite | 4 pain   | 5 hope   |
| 6 wonder | 7 thought | 8 care  | 9 sorrow | 10 doubt |

## Extension

If you are adding the suffix **ful** to a word ending with **y**, remember to change **y** to **i** before adding **ful**, like this:

plenty            **plentiful**

Exception: if the letter before the **y** is a vowel, we simply add **ful**, like this:

play            **playful**

**A** Add the **ful** suffix to make these words into adjectives.

- |          |         |
|----------|---------|
| 1 beauty | 2 duty  |
| 3 fancy  | 4 mercy |

**B** Use a word with the **ful** suffix to fill the gaps when you write these sentences. The word in bold is a clue.

- 1 **beauty**    It was a \_\_\_\_\_ park.
- 2 **shame**    Everyone said it was \_\_\_\_\_ when it was dug up for a new road.
- 3 **dread**     They made a \_\_\_\_\_ mess and noise.
- 4 **hope**     We are \_\_\_\_\_ that the traffic won't cause too many accidents.
